

# It's time to make a change to our prior authorization process.

Inspire has moved from an experimental procedure to a widely accepted one with coverage across all major insurance carriers. To ensure that we continue to remain compliant in the future, we are changing the prior authorization process.

## What you need to know:

- ▶ Starting the 1st quarter of 2023, ENT clinics will conduct prior authorizations for the vast majority of their patients, rather than going through the Inspire prior authorization team.
- ▶ ENT clinics will obtain authorizations much like they do for other procedures.
- ▶ Inspire will continue to support prior authorizations for complex cases and denials.

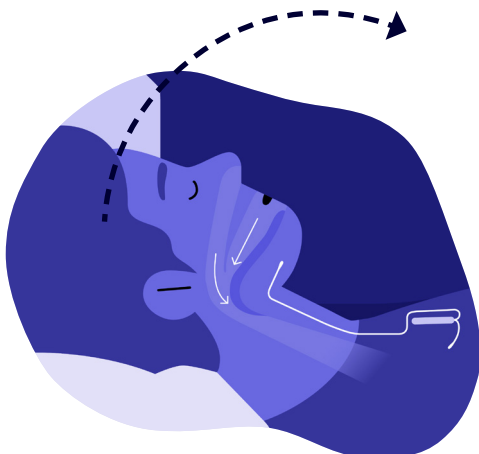

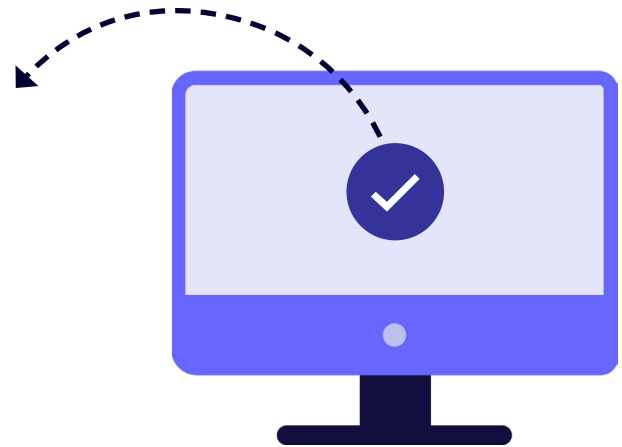

## Ready.

- ▶ Get prepared for the change.
- ▶ Identify staff members who will take an active role in the prior authorizations at your ENT clinic.
- ▶ Share training information and support tools with them to ensure a smooth transition.

## Check.

With this new prior authorization process, you can expect:

- ✔ Faster approvals by reducing the number of steps
- ✔ More control with an easy-to-use tool to quickly check if your patient meets criteria
- ✔ Greater efficiency by avoiding delay from unreliable faxing and submitting directly through the payor portal

## Go.

Training webinars led by our Prior Authorization team will be held periodically.
